

# testing websites at ease

**A. K. A. How to add features without breaking stuff that works?**

**whoami**

- Full-Stack developer at tjekvik.dk
- Ruby, JavaScript & CSS
- Teaching coding as a hobby

# Day 1

- Why automate testing, what is software quality?
- Set up CodeceptJS project and write some first tests for TodoMVC app.
- TDD with CodeceptJS on own projects (alone or in pairs)

## Day 2

- Continue on projects started day before.
- CodeceptJS internals (if there's time left).
- How is it to work in developers team?
- Scrum and Agile introduction.
- Wrap up workshops, Scrum like retrospective session.

# Let's start!
